

## Corporate Backgrounder

### Company

In 1998, Third Sector Systems developed a completely new and innovative system that replaces the spreadsheets and databases nonprofit staff members individually use with one comprehensive system that enables them to build an organizational memory, protect themselves from staff turnover and work together regardless of geographic location.

For the last six years, Third Sector Systems has worked closely with their client base, enhancing and refining the system based on feedback from intensive use. Sizable investments in Research and Development have resulted in a super rapid application development environment that enables Third Sector Systems to quickly react to customer feedback and capitalize on new opportunities.

### Products & Services

**Mission Maestro™** represents a revolutionary approach to nonprofit information management. It is a comprehensive software system that manages all aspects of a nonprofit organization's 'business' from programs and services to email to fundraising to special events.

**First Chair™** is free fundraising software that nonprofits can expand into a comprehensive organizational system. First Chair™ is Mission Maestro™ in modules that all nonprofits can afford and benefit from.

**Internet Bridge™** harnesses the Internet's power to connect remote sites.

**Data conversion services** provide conversion and integration of customers' existing data into either Mission Maestro™ or First Chair™.

**Custom training classes** use cutting edge technology to train users economically at their own desks.

### Investors

Third Sector Systems, Inc. is a profitable privately held corporation, funded by both institutional and individual investors.

### Customers

Every day hundreds of satisfied users across the country rely on Mission Maestro™ and First Chair™. Third Sector Systems' is the constant in our customers' operations. Our customers have turned over their entire staff and continued to operate effectively because our software develops and protects their organizational memory.
